

Environment Policy

Moalajah commits itself to rendering services in a manner that is environmentally sustainable, in line with the values embraced by its shareholders.

Moalajah commits itself to:

- ❖ Complying with all applicable environmental, legal and other regulations
- ❖ Preventing pollution whenever possible
- ❖ Reducing carbon footprint through various initiatives
- ❖ Minimize waste and then reuse or recycle as much of it as possible thus promoting a circular economy
- ❖ Promote efficient use of materials and resources throughout the facilities under its operational control. Such resources may include water, electricity, raw materials and other resources, particularly those that are non-renewable
- ❖ Train all of its staff on its environment policy and empower them to contribute and participate
- ❖ Where required by legislation or where significant public health, safety or environmental impacts exist, develop and maintain appropriate mitigation emergency response programs
- ❖ Communicate its environmental commitment and efforts to our staff, customers, shareholders and the communities
- ❖ Measure the environmental impact of its activities and continually strive to reduce adverse impacts by adopting sustainable, improved and environment friendly practices
